## Experience

### USC Computer Science Department

*Fall 2007 - Present*

Graduate Research Assistant in Laurent Itti's iLab

- Currently working on vision and point cloud perception systems for the DARPA Humanoid Robotics competition.
- Implemented NRT, a C++ modular programming framework for distributed image processing and robotics.
- Implemented tracking and object recognition systems for DARPA's Neovision2 project.
- Implemented a distributed attention system for DARPA's Cognitive Technologies Threat Warning System (CT2WS) project.
- Performed circuit design, assembly, and embedded programming for Beobot2.0, iLab's next generation 16-core mobile robot.

### NASA / Jet Propulsion Laboratory

*Summer 2012*

Intern in the Computer Vision for Surface Applications Group

- Tuned and optimized a vision based monocular stabilization system for use in a quadrotor.
- Built an extensible framework for managing JPL's fleet of quadrotors in ROS.□
- Ported a Rapidly Exploring Random Tree path planner for use on the quadrotors.
- Wrote an efficient Alpha/Beta filter to integrate and smooth quadrotor velocity and IMU data.□

### South Pasadena Educational Foundation

*Summers 2007 - 2011*

Teacher Trainer

- Designed a robotics curriculum to be taught to middle school students.
- Provided weekly training sessions for teachers.

### USC Computer Science Department

*Fall 2007 - 2009*

CS445 Introduction to Robotics Lab Assistant

- Designed and taught curricula for weekly three-hour lab sessions.
- Designed and built a custom robotics controller board based on a 600Mhz Overo processor.
- Built a software architecture and library to help the students cross-compile and upload code, as well as libraries for motion control, data acquisition, image processing, and communication.

## Microsoft

Summer 2004

Intern in the Security Division

- Developed security database migration tools in C#.
